GAMEPLAY

1. The goal of each player is to capture the opponent's **FLAG** or eliminate all the opponent's movable game pieces to win the game
2. Positioning the game figures:
 - A cover is placed between the two players. The board has 10 x 10 squares, with the two central rows being water obstacles that cannot be crossed
 - Each player has 40 game pieces with different ranks and abilities. These figures must be placed in the four rows on their side of the board. The players can only see their own setup

- Special abilities of game pieces:
 - **Spy:** Can defeat the Marshal (Rank 10)
 - **Miners:** Can defuse Bombs and win against them
 - **Scouts:** Can move any number of squares in a straight line but can only attack one square at a time
 - The game can start after all game pieces have been placed on the field
 - The player who placed all own game pieces first is allowed to make the first move
- Note: Flag and Bombs can't be moved anymore after the game has been started

3. Making moves:

- Players take turns moving one of their game pieces horizontally or vertically to an adjacent square. Pieces cannot jump over other pieces or move onto water obstacles
- A move must be made within the defined time. After the time runs out, the player loses the game

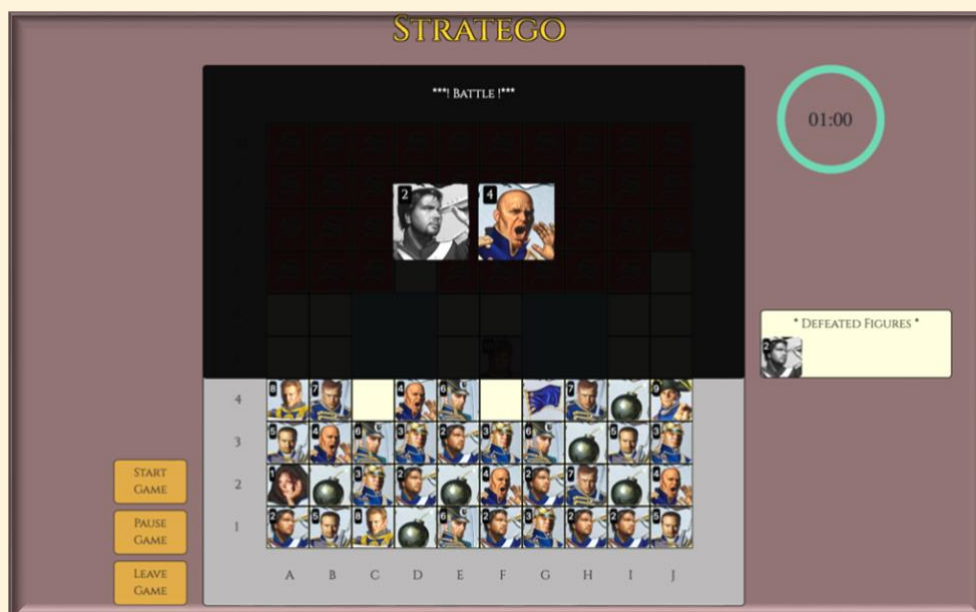

4. Attacking:

- When a game piece moves onto a square occupied by an opponent's piece, a battle occurs.

The battle is carried out as follows:

- a. The piece with the lower rank is going to be removed from the board
- b. If the ranks are equal, both pieces are going to be removed
- c. The attacking player moves his game piece onto the square of the defeated piece

TIPS AND STRATEGIES

1. Protect your **FLAG**:
 - Place Bombs around your Flag and strong pieces nearby to fend off attackers (e.g. see picture below)
2. Confuse Your Opponent:
 - Place lower-ranked pieces near Bombs to mislead your opponent
3. Utilize Scouts:
 - Explore the positions of the opponent's pieces early in the game
4. Protect your Marshal from the opponent's **Spy**

Enjoy the game!
